SUMMARY

Computer Science undergraduate with a focus in backend development, seeking an internship to apply academic knowledge to real-world projects and collaborate with experienced professionals.

EDUCATION

California State University Long Beach
Bachelor of Science in Computer Science

Graduation Date: May 2026
Long Beach, CA

EXPERIENCE

theCoderSchool
Coding Coach

Sep 2023 – Present
Cerritos, CA

- Proficiently mentored 30 young minds (ages 8-17) in Python and Scratch coding, fostering creativity and refining problem-solving skills.
- Implemented personalized mentoring sessions, upholding a low 2:1 student-to-Code-Coach ratio, guaranteeing individualized guidance and a distinct learning journey for each student.
- Cultivated a lasting enthusiasm for computer science by motivating and supervising independent coding projects, igniting a genuine passion for the field.

Data Entry Specialist
Beads Factory

May 2021 - Sep 2022
Cerritos, CA

- Served as a Data Entry Specialist at Beads Factory, employing technical proficiency in warehouse operations. Specialized in the meticulous recording of inventory and shipments, honing precision and data management aptitude.
- Applied technical expertise in data entry and inventory management at Beads Factory, ensuring the accuracy and integrity of records for optimized warehouse operations.
- Demonstrated proficiency in precise data entry and inventory management techniques, enhancing attention to detail and proficiency in data handling during tenure at Beads Factory.

Recreation Specialist
City Of Downey

Apr 2022 – Sep 2023
Downey, CA

- Expert recreational leader with a focus on group coordination and executing city-related assignments. Valuable contribution to event planning and execution within collaborative team settings.
- Proficient in leading city-centric activities and events, showcasing strong teamwork and organizational skills in the planning and execution process.
- Demonstrated leadership capabilities in coordinating recreational activities, ensuring seamless execution of city-related tasks, and effectively leading teams for successful event planning and execution.

PROJECTS

Personal Portfolio Website | *Python, HTML, CSS, JavaScript*

June 2023 – Present

- Created a full-stack portfolio website featuring a dedicated section with instructional YouTube videos on Python basics.

Speed Typing Test | *Python*

May 2023 – June 2023

- Designed a user-friendly interface, integrated a timer function, monitored user input, and computed typing speed.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS

Developer Tools: Git, GitHub, VS Code
